Jl. Pasir Buncir Village No.17, Cinagara, Kec. Caringin, Bogor Regency, West Java 16730

Undergraduate Student of Pakuan University Computer Science Study Program. A person who eager to learn, highly motivated, and passionate for a new experience. Interested in information technology, and interested into Web development & Cyber Security, also dedicated to keeping up with IT trends and creating impactful apps, also able to design, implement and manage effective security solutions to protect critical data and infrastructure.

## Experiences

### Westland Universal IND - Indonesia

Mar 2022 -

#### Web Development & Co-Founder

As a web developer and co-founder in a tapioca flour export business, I play a crucial role in supporting digitalization and global market expansion. I am responsible for designing, developing, and managing the company's website platform, which serves as the central hub for information and communication with potential international clients. Through a technology-driven approach, I help the company achieve high efficiency in the export process, from order management to payment integration.

### Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka - Indonesia

Sep 2024 - Present

#### Cohort Cloud Computing

The Cloud Computing cohort at Bangkit Academy, led by Google, Tokopedia, Gojek, and Traveloka, is designed to equip participants with in-depth knowledge and practical skills in cloud technologies. This program focuses on essential topics such as cloud infrastructure, networking, storage, security, and scalability, enabling students to build, deploy, and manage cloud-based applications.

With expert guidance from industry leaders and real-world projects, participants gain hands-on experience in cloud platforms, preparing them for careers as cloud engineers, architects, or administrators. By the end of the cohort, students will be proficient in leveraging cloud technologies to solve complex business challenges and support digital transformation across various industries.
